Smart Prepay Control

vOne

Introducing the vOne

The vOne is a wirelessly operated prepay and billing device, designed to monitor residential metering systems. It can be easily installed during a new build or retro-fitted into existing energy schemes. The vOne is designed to work with one utility and comes with a back lit, ENE3 compliant display, with a button operated control panel.

App based control

Our vOne also has the option of App-based control which utilises the latest technologies for ease of use and data display.

vOne product features:

Key Prepayment Features

- ✓ ENE3 code for sustainable home compliant display
- ✓ Easy installation from 1 to 1000+ units – no infrastructure required
- ✓ Easy retro-fit into legacy systems
